

WORLD INNOVATION

**YOUR ADVANTAGES
AT A GLANCE**

Avoid
LOST SALES OPPORTUNITIES!

Fully automatic recognition based on Visible Light Sensing & Machine Learning of the following functionalities:

- ✓ Stock level
- ✓ Spoiled goods
- ✓ Hit rate (detection of the number of accesses)

Fully integrated into linear luminaire

Mounting of the luminaire as before – no separate mounting of a sensor!
The luminaire is operated by a protective extra-low voltage of 24VDC – no separate power supply, no data lines!

Communication

The sensor technology of the luminaire communicates wirelessly (ZigBee, WLAN or Bluetooth) with signal displays, apps or ERP systems. Assessment also works without the cloud, so no data go off-site.

LUMITECH presented a **WORLD'S FIRST** at EuroShop 2023:
Shelf lighting with integrated **SENSORS** and artificial intelligence!
