

LUMITECH DATASHEET - Architectural Line IP67

PRODUCT DESCRIPTION

- Highly efficient architectural lighting
- Available in a variety of light colours & intensities
- Protection class IP67 - suitable for outdoor use
- Ready-to-connect solution, as a single luminaire, or as a luminaire for serial wiring
- High performance due to perfect thermal management
- Excellent illumination due to use of innovative linear optics
- SELV
- Easy mounting by use of mounting plate & mounting bracket
- Heat sink made of anodised, extruded aluminium
- Sustainable protection against humidity and corrosion by sealing of LED modules
- End caps made of ABS
- Lens made of PMMA
- Dimmable

TECHNICAL DATA

Supply voltage	24 VDC
Ambient temperature t_a	-30 ... +55 °C
Max. surface temperature on profile t_c	70 °C
Type of protection	IP67
Protection class	III
Risk group (EN 62471:2008)	1

GLARE LIMITATION OF STRAY LIGHT

Luminous intensity class G3

Gamma	Cd/klm measured	EN 13201-2
70	74	-
80	23	100
90	1,4	20
>90	0	-

Non-replaceable light source

LUMITECH DATASHEET - Architectural Line IP67

Packaging: 6 pieces/carton, 180 pieces/pallet

- All typical values for Ta=25°C +/- 2°C
- Luminous flux min. value = typ. value - 20%
- Tolerance mechanical dimensions +/- 1mm
- Tolerance electrical data +/- 15%
- Tolerance optical data for CW,WW & NW +/- 15% (LED Modul @ 60mA string current)
- Tolerance optical data for PC, BP +/- 15% (LED Modul @ 100mA string current)
- Tolerance min. value CRI -1

*xx = light color (see color code on page 3)

* yy = current supply 80mA or 120mA (see luminous flux table on page 3)

*x = Version:

C = cable and connector on both sides (male/female)
for serial wiring
E = one-sided cable (plug) -
for single luminaire, or end luminaire

*BW = Batwing

*NB-ASY = Narrow Beam asym.

COLOUR KEY

Code	CW	NW	WW	PC	BP
CCT	5000K	4000K	3000K	2700K	2400K

CONVERTER

Output voltage	24 VDC +10 %
Power LED driver	= sum of typical power of light engines + 20 %
Daisy chaining (luminaires)	max. 65 LED modules „L14-2“ at 80mA max. 45 LED modules „L14-2“ at 120mA

Electrical supply/choice of LED driver

Architectural Line products from Lumitech are not protected against overvoltages, overcurrents, overloads or short-circuit currents. Reliable and safe operation of the Architectural Line can only be ensured by using LED drivers that comply with the relevant regulations. When selecting the LED driver, the following protective functions should be ensured:

- SELV
- Short-circuit protection
- Overload protection
- Overtemperature protection
- Protection against environmental influences

The Architectural Line must be operated on 24V constant voltage LED drivers. Operation on a constant current LED driver will result in irreversible damage to the luminaire. Reverse polarity can damage the luminaire.

STANDARDS

- EN 60598-1
- EN 60598-2-1
- EN 62031
- EN 62471

THERMAL BEHAVIOUR

Operating temperature [operation, no defects]	ta	-30 ... +55 °C
Storage temperature	ts	-40 ... +80 °C
Temperature cooling profile ¹²	tc	-30 ... +70 °C

¹ Values apply to operation at 100% output, natural convection.

² If the maximum temperature limits are exceeded, the lifetime of the module will be greatly reduced or the module may be destroyed. The tc point temperature at the profile of the light engine should be measured in the thermally stable state and under operating conditions by means of a temperature sensor or temperature-sensitive sticker (available for example from conrad.com or rs-components.com) in accordance with EN60598-1. The entire profile can be used as the tc point.

Note

- Installation should only be conducted by a licensed electrician.
- Reversing the polarity can damage the product!
- Make sure the converter has been switched off prior to connecting the light engine. If this is not observed, the light engine may be damaged!
- Connection or operation is only permitted when using the specified converters. Higher voltages result in damage to or failure of the light engine.
- Installation position: downwards (0° horizontal to max. 90° vertical)
